

# MECHANICAL BRUSH CRUSHERS

## BC-3000

- Small mechanical unit for TA-55 and 10 - 25 HP tractors
- No added hydraulics or cylinders
- Independent action utilizes cylinders on loader to open and close

- No more buckets & chains!
- Simple shape and open design allows clear view
- Precise control to move items like culverts or tubing without causing damage

## BC-4000

- Medium mechanical unit for 100 series loaders
- No added hydraulics or cylinders
- Adjustable fit installs over end of loader arm

- Independent operation makes handling unruly and lop-sided loads easy
- Crush with power--Manhandle a pile of logs and easily move piles of brush

## BC-5000

- Large mechanical unit for loaders
- No added hydraulics or cylinders
- Fits Snap-Attach™ quick-change attachment system
- Independent action utilizes cylinders on loader to open and close
- Optional tie-bar available

# HYDRAULIC BRUSH CRUSHERS

## BC-6000

- Simple shape and open design allows clear view
- Hydraulic power teeth add power, control and versatility
- Fits Snap-Attach™ system
- Optional tie-bar available

## BC-7000

- One-piece unit is 56" wide
- Features hydraulic power teeth that are ideal for the heavy user
- Fits universal skid-steer adapter
- Optional quick-attach finishing teeth (BC-700)

Quick-mount finishing teeth clean up what's left behind after handling trees and brush

## MONSTER BRUSH CRUSHER BC-8000

- One-piece unit is 72" wide
- Features hydraulic power teeth that are ideal for the heavy user
- Lower teeth work in unison
- Fits both loaders with Snap-Attach™ & skid-steer adapters
- Optional quick-attach finishing teeth (BC-800)

Ideal for skid steers with cabs
