Westendorf loaders are known for their many advantages - but the proof is in their performance. A Westendorf will do everything you want a loader to do, and more. Maneuver better! Load more! Dump higher! Work faster! The styling of Max not only has an undeniable WOW factor, but the intelligent design offers unsurpassed quality, performance and strength.

Change attachments with a push of a button. It’s so easy, you’ll always use the right tool for the job.

Enjoy the freedom of mounting the Max loader from the comfort of your cab. No stands. No time. No tools. No pins required. The solid mount bracket system simply rotates over the tower, self-locking the loader in place. It is a self-aligning and self-tightening system; the more you use the loader the tighter the connection becomes.

Hook up hydraulics AND electronics with one, easy-to-operate handle. The Flat Face Hydra-Snap keeps the connections clean with the built-in dust cover, and the parking plate provides convenient storage too.

The loader fits properly with the bucket close and arms that compliment the tractor’s hood contour.

Keep fenders on most tractor models with optimum row settings to maximize your turning and oscillation ability.

Max has hidden hydraulic hoses routed inside the arms and positioned behind a sculptured jacket to protect the lines with style.

Hiding the hoses not only suppresses wear, but allows for unencumbered visibility that no other loader comes closer to offering.

Smart-Pac cylinders are exclusive to Westendorf and don’t have any external hoses, lines or fittings for a cleaner appearance and longer hydraulic life. The patented swaged barrel automatically compresses the seals past the barrel’s edge during assembly for consistent quality.

Famous for bigger, stronger and cleaner bucket designs, Westendorf understands how to build a bucket that lasts. A tapered, rib-free interior empties quickly and is reinforced externally for added strength.

Our experience has proved the double tapered arm is the key to superior arm strength.

The smaller details are what really make a difference for long term reliability and performance. Large, heavy-duty grease-from-the-ends pins with two-sided locks, integrated grill guard, rotational indicator, power-linkage, high energy decal package, and optional synchronizer bar are a few.

All Included in Loader Package:
- Freedom Mount
- Auto-Lock Mounting System
- Low-Profile Visibility
- Remote Control Coupler
- Flat Face Hydra-Snap
- Max Tire Clearance
- Performance Plus
- Smart-Pac/Lineless Cylinders
- Hidden Hydraulics
- Arm Strength
- Bucket Reputation
- Solid Brackets
- More Functions
- Full Featured
- Attachments Plus
- Loader Envy
