Patent Pending

STACK SAVER II

STACK SAVER II

Allows You To Pull The Bale Spear Out Automatically

STACK SAVER II

1 With the Stack Saver II position the bale where you would like it.

2 Extend the bucket cylinder. Note: the rear frame holds the bale stationary as the spear is removed.

3 You are now free of the bale and the stack is standing straight.

Available

MODELS

The Stack Saver II is available in several tine configurations.

Westendorf Manufacturing Co., Inc.

Also Introducing the *Patent Pending*
STACK SAVER I
for Round Bales

STACK SAVER I

1
 Position the bale where you would like it.

2
 Extend the bucket cylinder. Note: the push plate holds the bale stationary as the spear is removed.

3
 You are now free of the bale and the stack is standing straight.

Offering the *Original Patented*
SNAP ATTACH SYSTEM™
from WESTENDORF

Westendorf's patented Snap Attach System™, allows the loader operator to remove the bucket quickly and easily, and mount attachments without leaving the tractor seat. This system turns your loader into a multi-purpose workhorse.

Your present attachments can also be adapted to the Snap Attach System™, by purchasing a pair of couplers, available with the weld-on (C-2) or bolt-on (C-3) option.

C-2

You may utilize the 'Stack Saver' and our patented Snap Attach™ with other brands of loaders, by purchasing our C-15 Universal Quick Couplers.

C-15

The Stack Saver may also be used with other brands with pin type bucket, with our P-6 Pin Adapter.

P-6

We are continually developing and designing, therefore, reserve the right to change without any liability.
